Passcode: t9wk6N

- 9:30 **Welcome & Introductions**
- 9:45 **June & September Riparian Workshop Report-outs** Suzanna Smith
Informal presentation/discussion
- WRIA 9 hosted two virtual workshops in summer 2024 to identify roadblocks to riparian revegetation projects, brainstorm potential solutions, and improve tools like the Revegetation Tracker to support Regreen the Green project sponsors and review teams.
- 10:10 **Stream and river monitoring: nutrient patterns** Jeremy Walls
Presentation followed by Q&A
- [King County's Stream and River Monitoring Program](#) monitors lake and stream water quality, tracking temperature, dissolved oxygen, pH, turbidity, nutrients, and other parameters at sites throughout the county. Jeremy Walls will present an in-progress assessment of patterns in nutrients at monitoring stations and discuss potential impacts and future studies. [Read more about the history of the Stream Monitoring Program.](#)
- 10:40 **Monitoring and Research Priorities for 2025 RFP** Iris Kemp
Group discussion
- The Monitoring and Research grant program supports effectiveness monitoring and ongoing research to address data gaps within WRIA 9. While the Request for Proposals (RFP) for this program is intentionally kept flexible and broad, we typically identify a few priorities that project sponsors are encouraged to address. We will use this time to discuss ITC perspectives on priorities for the 2025 Monitoring and Research RFP.
- 11:00 **Round Robin Updates** All
Miro map activity
- We will revisit our mapping activity for round-robins, placing updates throughout the watershed and discussing as a group. If you're not able to attend the meeting but have an update to share, please email Iris directly at ikemp@kingcounty.gov.
- 11:30 **Adjourn**
